## BS EN ISO 9001:2008

**Spinnings & pressings in all metals to all trades.**

*We have over 65 years experience in supplying engineering companies with components to their own design or drawing.*

*Modern techniques and facilities enable us to be competitive with large quantities and also small batches.*

*BS EN ISO 9001:2008 certification enables us to provide certificates of conformity and full traceability on all orders for the following services:*

### **Metal SPINNING**

Hydraulic spinning in all sizes and shapes up to 2 1/4 m (89") dia. in all metals and gauges up to 10 mm steel – 6 mm stainless steel, dished & tank ends, flanges & cones etc. Stock tooling available.

### **FLOW FORMING**

Up to 2 1/4 m (89") dia. for shells, cones and work requiring guaranteed material thickness.

### **HAND SPINNING**

General engineering precision work to tolerance.

### **PRESSING**

Power press up to 100 tons, double & single action, and also a full range of hand & special presses.

### **We also offer the following services outside of our ISO certification:**

### **LASER CUTTING**

We are able to offer a comprehensive laser cutting service that will enable your designs to be realised. Our in house design capabilities mean that we can produce the CAD drawings that your designs and components may require. At Winward we service both small and large batch laser cutting at very competitive prices.

### **WELDING &**

Mig welding, spot welding, metallic arc and gas welding.

### **SOLDERING**

All types of soldering & brazing, together with assembly work.

### **SHEET METAL WORK**

Circle cutting up to 3 m (9'), blanking, shearing, cropping, guillotining and tube bending.

### **Experimental, Prototyping.**

We have a comprehensive range of tools, which with our other facilities enables us to produce prototype, and experimental work to customers special requirements, with minimum tooling costs.

### **MACHINING**

We can finish machine many different spinnings to very tight tolerances, ensuring accurate and consistent components, in large & small quantities.

### **LABORATORY EQUIPMENT**

An extensive range of laboratory equipment, electrical parts and components to customers own design.

### **METAL FINISHING**

Hand & auto polishing, diamond turning and lacquering for all metals. We powder coat in many colours using polyester stoving powders. The work is pre-treated using our on-line phosphate coating plant.

We can offer services to produce high or low quantities according to customer's requirements, with excellent delivery. Trusting that you will find the above information of interest, we look forward to receiving your enquiries, which will receive our prompt attention.
